Quality leather boots from Europe

WIFA – the leather boot from Europe

WIFA boots have been handmade in Europe since 1960. WIFA uses only the strongest cowhides from Europe for all models, tanned according to the strict environmental regulations of the EU.

The benefits of a leather boot

Leather is naturally flexible, breathable and long-lasting. It fits like a second skin and moves with the foot.

All WIFA skates are padded and made of firm and thick leather (2.2-2.4 mm). A thin layer of thermoplastic reinforcement allows each WIFA ice skating boot to be heat molded. During this easy procedure, the boots are put in the oven and heated at an average temperature of 80°C/176°F. Then they are fitted directly to the foot by lacing them tightly. The heat molding process shortens the breaking-in time and eliminates pressure points in less than an hour. (heat molding, the WIFA Technical Guide).

The long life of WIFA leather ice skates, a tribute to sustainability

The WIFA Prima children boots have the longest lifetime. They are shared and reshared, for decades, serving as rental boot in the end.

Adults who discover ice skating as their favorite sports find a boot for life in their WIFAs, that support them well fitted all the way long.

The WIFA ice skating boots are made of about 80% natural materials, ensuring an excellent foot climate. The thin reinforcement layers inside the boots are needed to provide stability but also to allow the heat molding process to work properly. The boots are literally reshaped on the foot. After cooling down, the boots fit like a second skin. This effect persists thanks to these layers.

The right „setting“ for each performance level

What is the right boot model?

We make a distinction between pure leisure skating and figure skating training, as these two large groups have different needs. While the first group focusses on comfort and security, the latter takes more interest in performance, support and flexibility.

Some models are only suitable for leisure skating (WIFA DUO), some for both, leisure skating AND figure skating training (Prima, Prima Intermediate, Champion Light), and others are competition boots. With the help of our model guide, you will be able to determine what category you feel to belong to.

What are the right blades?

We use the word „set“ for combo offers of boots with blades mounted. For „SETS“ no charges apply for the mounting service.

We work together with the best blade manufacturers. Even our beginner blades Mark II (Ultima, Canada) and Flight (MK, GB) are made of best, mirror-chromed steel. **They have a good industrial ready to skate sharpening for pure recreational skaters.** For beginners it will be sufficient to sharpen the blades once a year.

Are the blades to be sharpened?

For leisure skaters the industrial sharpening is basically sufficient – our brand blades are made of excellent steel and have a good industrial sharpening.

For first figure skating courses though, we recommend a standard figure skating sharpening (SETs with Mark II or Flight blades). Skilled skaters who opt for the better set with cross pick competition blades can decide whether they go for a standard sharpening with polishing or even a professional sharpening. For competition blades, a professional sharpening is a must.

Ice skating in the cold season, roller skating in the warm season?

With winters getting milder and shorter, the trend to continue training on quads or inline roller plates after winter is becoming more and more popular. For figure skaters, the choice to make is rather simple. They need just to unmount the blades and remount either on quads or on inline plates on their boots.

One pair for both sports ?

All models of our ice skating collection can be converted to quads/inline skates. This makes particularly sense for adult leisure skaters who want to try out roller skating without spending too much money on a completely new set.

Also smaller children still growing a lot can still benefit from the boots after the winter season. The blades can then be remounted after the summer and the set can be used again or resold if feet have outgrown the size.

Which WIFA skating models are particularly suitable for both sports?

Adult figure skaters can change once or twice to try out whether roller skating suit them.

If fond of both sports – the skaters will have one pair for ice and one pair for roller skating.

MODEL-GUIDE

The WIFA skate model guide is based on data from our European test skaters (age, performance level, weight, training hours, skating style).

Hardness levels of the models

Since WIFA boots are made of leather, they actually are to be considered a class of their own. The properties of leather are different from plastic, the leather does not break, it slowly softens. The degree of hardness given for the models is therefore primarily for orientation when comparing them with models from other brands.

WIFA model guide

1. Basic figure skating courses, recreational skating (2-4h/week)

- Children 4-6 years ▶ Prima Children (sz. 24-35)
- Children 7-9 years ▶ Prima Children (sz. 24-35)
- Children 10-14 years DUO Deluxe (sz. 34-42)
- Youth & Adults ▶ Prima Ladies (sz. 3½-8)
Prima Intermediate (sz. 3½-12)

2. Advanced hobby skating & first championships (4-8h/week)

- Children 4-6 years ▶ Prima Children
INTI (sz. 26-35)
- Children 7-9 years ▶ INTI

Champion Light (sz. 1-12)
- Children 10-14 years ▶ Prima Intermediate
Youth & Adults Champion Light

3. National & intern. Competitions (from 8h/week)

- Children 4-6 years ▶ INTI
- Children 7-9 years ▶ INTI
Champion Light
- Children 10-14 years ▶ Champion Light
Youth & Adults Champion Reinforced (sz. 1-12)

DUO DELUXE

ICE SKATING

recreational skaters (no jumps!)

ROLLER SKATING

trail/jam skaters (cruising/dancing)

MODEL SPECIFICATIONS:

Sizes	EU 34-42
Colours	Navy
Width	C (wide)
Upper	nubuck leather
Lining	soft trekking micro fiber
Soles	leather, natural colour
Set blades	MK Flight
Hardness	ca. 25

Hybrid model for ice and roller skating

An easy switching from ice skating to roller skating while using the same pair of boots – this is what recreational skaters dream of. WIFA makes this wish come true with a new model „DUO“ that has it all.

The **DUO Deluxe** is a little softer at the shaft end and therefore more flexible than an ice skate. Nevertheless, it offers sufficient support in the ankle and ball area to ensure safe gliding on the ice.

From blades to plates – how to remount

Skilled craftswomen & craftsmen can do the mounting themselves. Please find the mounting instructions on our website.

Tip for the retailer:

This model is made in the wider standard width „C“. As it is slightly softer in the ball area than the standard WIFA skate and therefore stretches within a short time. Heat molding is not necessary nor recommended.

WIFA DUO DELUXE

DUO DELUXE

available
in sizes:

34-42

PRIMA LADIES

ICE SKATING

leisure, first courses, dance

ROLLER SKATING

artistic roller skating on quads and inline skates, park skating

MODEL SPECIFICATIONS:

Sizes	EU 3½-8 (36-42) / <i>full and half sizes for closer fit</i>
Colours	white
Widths	LL, C
Upper	thick split leather, coated (2,4-2,6mm)
Lining	soft trekking micro fiber
Soles	leather, natural colour
Set blades	MK Flight, industrial sharpening, mounting included
Hardness	30
Specials	heat moldable

The white ladie's boots for first figure skating courses and recreational skating!

The **Prima Ladies** is the classic ladies' boot of the WIFA ice skating boot collection. It is made on the wider last and available in the two main standard widths LL and C. It is a comfortable leather boot providing firm and secure support for hobby skaters attending their first figure skating courses.

i *Tip for the retailer:*

The standard widths for this model are LL in smaller sizes up to 4,5 (37) and C from size 5 (=38).

We recommend stocking both widths in the main sizes 4,5 to 6. Please order other widths in advance to avoid longer waiting times.

The heat molding is only recommended in case of pronounced foot problems (hallux valgus, bunions), as minor pressure points will disappear after a short breaking-in period.

Please read all relevant info on heat molding in our Technical Guide.

WIFA PRIMA LADIES

▶ SET with **MK Flight**

PRIMA LADIES
available in sizes: **3½-8**

PRIMA INTERMEDIATE

ICE SKATING

skilled figure skaters, first single jumps, dance

Colours	white, black
Widths	white: L, LL, C, CC / black: LL, C, CC
Upper	thick split leather, coated (2,4-2,6mm)
Lining	soft trekking micro fiber
Soles	leather, natural colour or black
Blades set	MK Flight – industrial sharpening, mounting included
Hardness	35
Specials	heat moldable, soft Napa leather cushion

The reinforced figure skating boots made for comfort

The **Prima Intermediate** is available in 4 widths and English half sizes and is ideal for hobby skaters who want to devote more time to skating.

Extremely comfortable due to the soft leather cushion at the end shaft top. Particularly suitable for ice and roller skating.

i *Tip for the retailer:*

The standard widths for this model are LL in smaller sizes up to 4½ (37) and C from size 5 (=38).

We recommend stocking both widths in the main sizes 4½ to 6. Please order other widths in advance to avoid longer waiting times.

The heat molding is only recommended in case of pronounced foot problems (hallux valgus, bunions), as minor pressure points will disappear after a short breaking-in period.

Please read all relevant info on heat molding our Technical Guide,

ROLLER SKATING

artistic roller skating on quads and inline skates

MODEL SPECIFICATIONS:

Sizes	EU 24-35
Colours	white, black
Widths	white: M, L, LL / black: LL
Upper	thick split leather, coated (2,4-2,6mm)
Lining	soft trekking micro fiber
Soles	leather, natural colour or black
Set blades	MK Flight – industrial sharpening, mounting included
Hardness	35
Specials	heat moldable, soft Napa leather cushion

Recommended by coaches as the best beginner figure skating training boot!

Many stars have started their careers in their **Prima** boots. This model is the best to start with for its orthopaedic fit due to its many widths and its right balance between support and flexibility. Not too stiff, it allows the growing foot to develop muscles.

The **Prima Children** boot is available in 2 narrower widths (M, L) and a wide width (LL). The children last is wider than the adult last and slightly more rounded at the front.

The **Prima Children-SET** is the most sustainable model in the collection. It is being sold and resold uncountable times within the club or online and at a good price.

i Tip for the retailer:

The most popular widths are L (narrow last) and LL (wide last). If the feet are slightly narrower or wider than the measurements in the table, the boots can be narrowed down or widened by applying the heat molding process -> if the child grows a lot a repeated warm fitting may be necessary!

Please read all relevant info on heat molding in our Technical Guide.

WIFA PRIMA CHILDREN

▶ shorter heel
for child friendly
heel pitch

▶ rounder and wider at the
boot toe cap than the adult last

PRIMA CHILDREN

available
in sizes:

ICE SKATING

Figure Skating - Single Axel/Double Jumps

ROLLER SKATING

Roller figure skating on quads and inline skates

MODEL SPECIFICATIONS:

Sizes	EU 26-35
Colours	white, black
Widths	white: M, L, LL / black: LL
Upper	thick split leather, coated (2,4-2,6mm)
Lining	shaft-soft trekking micro fiber; tongue – anti-slip micro fiber-velour
Soles	leather, natural colour or black
Set blades	MK Flight – industrial sharpening, mounting included
Hardness	40
Specials	heat moldable, soft cushion at shaft end

First competitions!

The **INTI** is a figure skating training boot for children who have a weekly training throughout the year and are landing most single jumps. This model was designed to be flexible and firm enough to train and land first doubles. Don't let it be too hard – was the maxim to follow the feedbacks of coaches and skaters so that foot muscles have room to grow.

A soft and gentle cushion made of Napa leather was sewed at the upper's end. A notch, inside and out gives the boot flexibility.

Heat molding is highly recommended for second skin effect and improved power transmission.

Blades set offers

We suggest low-cost „SETS“ for beginners and advanced. Free mounting service is included in the „SET-price “. For competition skaters higher-end blades can/should be used at latest when starting double jumps.

WIFA INTI

▶ soft cushion at shaft end

▶ shorter heel

▶ rounder at the boot toe cap

▶ Notch for regulation of skating fold

INTI	
available in sizes:	26-35

CHAMPION LIGHT CHILDREN

ICE SKATING

Figure Skating - all single to double jumps

ROLLER SKATING

artistic roller skating on quads/inline skates, rhythm, park skating

MODEL SPECIFICATIONS:

Sizes	EU 1-3 (equiv. 32-35)
Colours	white, black
Widths	white: M, L, LL, C, CC / black: LL, C
Upper	thick split leather, coated (2,4-2,6mm)
Lining	shaft-soft trekking micro fiber; tongue – anti-slip micro fiber-velour
Soles	leather, natural colour or black
Blades set	MK Flight – industrial sharpening, mounting included
Hardness	45
Specials	heat moldable, soft cushion at shaft end and to end of the tongue

National and international competitions!

The **Champion Light Children** is a lightweight model for athletes who are mastering their first triple jumps.

The Champion Light in children sizes is flexible and has a soft, non-slip tongue made of high-quality microfibre velour. Thanks to the flex notch, it has a very short breaking-in time. Half sizes, 5 widths and a heat molding allow for a perfect fit!

Blade sets offers

We suggest low-cost „SETS“ for beginners and advanced. Free mounting service is included in the „SET-price“.

For competition skaters higher-end blades can/should be used at latest when starting double jumps.

i *Tip for the retailer:*

Please read all relevant info on heat molding in our Technical Guide.

Upper	thick split leather, coated (2,4-2,6mm)
Lining	shaft-soft trekking micro fiber; tongue - anti-slip micro fiber-velour
Soles	leather, natural colour or black
Blades set	MK Flight - industrial sharpening, mounting included
Hardness	50
Specials	heat moldable, soft cushion at shaft end

National and international competitions!

The **Champion Light** is a lightweight model for lightweight competitive athletes (35-55 kg) who are mastering their first triple jumps. This model has a very short breaking in time (5h) and is very flexible thanks to the flex notch. With its shorter shaft this model is also popular among dancers. Half sizes, 5 widths and heat molding allow a perfect fit!

Try out our **Color Customizable Skates Line - Champion Light** now available as One-Tone, Two-Tone or Multicolor customization!

Blade set offers

For competition skaters higher-end blades can/should be used at latest when starting double jumps. We suggest low-cost „SETS“ for beginners and advanced. Free mounting service is included in the „SET-price“.

BRAND BLADES

We work with the best blade brand manufacturers. All figure skating blades are made of the best mirror-chrome-plated steel.

The industrial sharpening of the brand blades we use is sufficient for purely recreational skaters in the first year; the sharpening should then be renewed each season. For first courses, we recommend a standard sharpening.

Professional sharpening is done by one of the best sharpeners of Vienna.

ACCESSORIES

WIFA protective gloves

QUALITY FEATURES:

- ▶ gel padding on the palm
- ▶ warm (up to 0°C)
- ▶ non-slip - silicone print
- ▶ perfect fit - stretchable, 4 sizes
- ▶ hardly noticeable seams
- ▶ sensitive touchscreen fabric

The index finger and thumb are reinforced. This allows skaters to grip the skate firmly.

The gel pads on the palm protect when falling and are soft and snug. Particularly comfortable, the seams are barely noticeable.

The gel palm padding is also appreciated by cyclists as they can lean on the bicycle's steering bar without feeling pressure points. These gloves can be used for many sports (ice, roller, cycling, fitness) and are now known worldwide for their quality.

Sizes:

4 sizes in black, 3 sizes in all other colours

- 1 (5-9 J)
- 2 (10-14 J)
- 3 (M standard size ladies)
- 4 (L ladies large, standard size men)

WIFA GLOVES PROTECTIVE

WIFA GLOVES FIGURE SKATING

ACCESSORIES

Skate guards (PVC)

The skate guards are part of the basic WIFA equipment. We work exclusively with the top brand **GUARDOG** from Canada.

The skate guards are to protect the blade when walking off ice. Both models are very easy to attach to the blades. Figure skaters prefer the double skate guards with spring as they are easier to handle.

GUARDOG skate guards instructions are available online.

Please always remove the skate guards after transportation so that residual moisture on the blades can evaporate.

The skate guards are available in 4 versions:

GUARDOG™

SolidZ™ ▶ *opaque*

SuperGlitz™ ▶ *with glitter*

SwirlZ™ ▶ *with scent*

ChameleonZ™ ▶ *color change with temperature*

SKATE GUARDS PVC

SKATE GUARDS FABRIC

The cloth covers or „soakers“ are put over the blade after skating so that residual moisture can still be absorbed so that no rust develops. They fit almost all blade sizes (shoe size 24-42). The soakers will also be appreciated by parents when helping their children to put on their skates on. Blades are sharp and cuts can easily happen.

We offer the **SoftPaws von Guardog** soakers in 3 versions:

The logo for Guardog, featuring the word "GUARDOG" in a bold, blue, sans-serif font. The letter "D" is stylized with a white outline and a blue fill, and the "O" is also outlined in white. A small "TM" trademark symbol is located to the right of the "G".The logo for SoftPaws, featuring the words "SOFT" and "PAWS" in a playful, rounded, red font. The "A" in "PAWS" is replaced by a white paw print with red outlines. A small "TM" trademark symbol is located to the right of the "S" in "SOFT".
